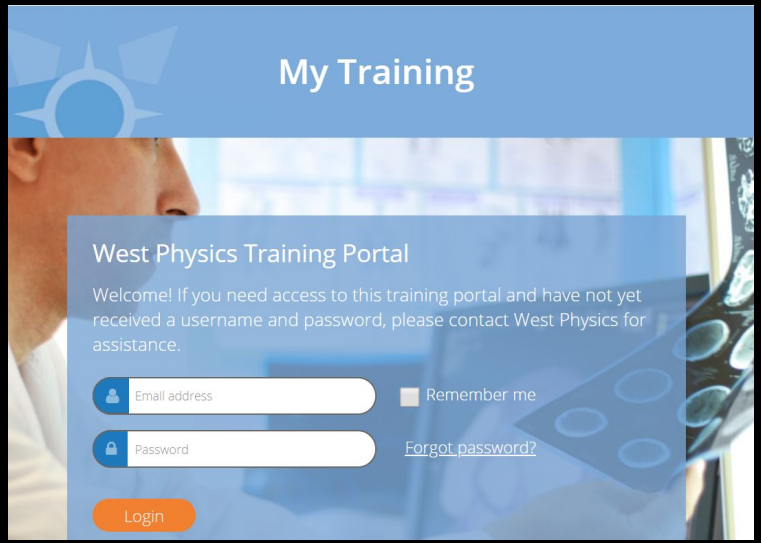
IAC Accreditation Application

Application Overview

1. Staff
2. Equipment
3. Policies & Protocols
4. Case Studies
5. Quality Improvement

1. Staff Action Items:

- **All Staff** must complete Radiation Training *via West Physics*
  - All Staff nursing personnel should also complete Radiation Training



Continuing Medical Education

- Each medical staff member has **3 years** (*before reaccreditation*) to finish **12 CME** credits relevant to CT

CME/ CE Resources (CT)

As outlined in the *IAC Standards and Guidelines for CT Accreditation*, part of the criteria for achieving CT accreditation is the fulfillment of certain Continuing Education (CE) requirements by facility staff members.

As a service to professionals looking for CT-related CME/CE, the IAC maintains the following list of resources for continuing education.

- **Upcoming CME / CE Courses**
- **Online CME / CE**

The IAC does not endorse nor guarantee the content and relevance to CT in meeting the CME / CE requirements.

http://www.auntminniecme.com

2. Equipment Action Items:

★ **All Requirements Fulfilled**

CT Unit Information and Documentation

- ☑ Manufacturer, model, serial number, software version, date of installation, maximum slice capacity or cone beam
- ☑ Report of acceptance test performed at the time of CT unit installation or CT system upgrade
- ☑ Routine operator quality control (QC) documentation (phantom images and log sheets)
- ☑ Report of preventative maintenance (PM) performed by the service engineer within the past 12 months (prior to date that the application will be submitted)
- ☑ Annual survey of image quality and radiation dose performed by a medical physicist or qualified expert within the past 12 months (prior to date that the application will be submitted)
- ☑ Post Installation Radiation Shielding Verification Survey (for new applicants or facilities that have replaced their CT unit since their prior application)

3. Policies & Procedures Action Items

- ★ **All requirements met**
- ★ *Printed Policies and Protocols located in CT binder*

Policies and Protocols

- ☑ **Preliminary and Final Interpretations Discrepancy Policy** *(only required if preliminary reports are generated)* - A mechanism for communicating any significant changes must be defined for those situations in which the final interpretation differs significantly from the preliminary report.
- ☑ **Patient and Employee Safety Policy -** A policy to ensure patient and employee safety to include, patient radiation safety and personnel radiation exposure monitoring
- ☑ **Acute Medical Emergency Policy -** A written policy for patient management that includes rapid recognition, response, and handling of the emergency situation.
- ☑ **Incident Report Policy** *(e.g., extravasations, patient falls)* - A policy for documentation of incidents (adverse events) in the facility.
- ☑ **Patient Confidentiality Policy -** A policy that all facility personnel must ascribe to professional principles of patient confidentiality as legally required by federal (HIPAA), state, local or institutional policy or regulation.
- ☑ **Patient Identification Policy -** A policy that outlines the process that assures accurate patient identification immediately prior to initiating the procedure.
- ☑ **Patient Pre-test Preparation Policy** *(if applicable)* - A policy for identifying and administering any necessary pre-test preparations (i.e., assessment of contraindications or sensitivities to intravenous contrast, administration of oral and/or intravenous contrast.)
- ☑ **Patient Pregnancy Screening Policy -** A policy that outlines process that assures that patients who could be pregnant are identified. This must be documented and contain the signature/initials of the patient and/or technologist verifying the information. This procedure must include an explanation of the proper steps to be taken if a patient may be or is pregnant.
- ☑ **Patient Complaint Policy -** A policy that outlines the process for patients to issue a complaint/ grievance in reference to the care/services they received at your facility.
- ☑ **Primary Source Verification Policy -** A policy for verifying all medical and technical staff member credentials through the applicable issuing agencies.
- ☑ **Medication and Contrast Administration and Supervision Policy** *(if applicable)* - A policy that delegates the supervision of the administration of contrast and/or medication administration to alternative licensed providers if the Medical Director or medical staff are not present.

4. Case Study Action Items:

- All Staff must *ORDER* and *INTERPRET* Case Study each for IAC review
- Case Study must include:
  - Established Patient scanned
    - Patient exhibiting pathology
  - CT Parameter Form completed
  - CT Scan Final Report
    - Verbiage meets IAC criteria *Shortcut text available*
    - Finished within **4 days** of CT scan acquired date

For facilities/CT units that perform various types of CT examinations of MAXILLOFACIAL CT:

Temporal Bone that must demonstrate pathology such as:

- Mastoiditis
- Cholesteatoma
- Tumor / cancer
- Other pathology

Sinus that must demonstrate pathology such as:

- Chronic sinusitis
- Deviated nasal septum
- Polyps
- Trauma / fracture
- Other pathology

Pre-Submission Action Items:

Step 3: Complete Online Application

Step 4: Pre-Submission Case Study Requirements Check

- ☐ About two weeks prior to the expected final submission date, the pre-submission case study requirements check must be initiated. IAC staff will review case study documentation in the application to ensure accurate case study selection, staff and site representation.
- ☐ Facilities will receive an e-mail from the IAC within two business days to update their case study documentation, as requested, or proceed to final submission.
- ☐ The check is performed to provide a more efficient application submission and review process for the facility. **Case study images should not be uploaded or sent to the IAC office until the pre-submission case study check is complete.**
- ☐ Once the pre-submission case study requirements check has been completed and any errors rectified, you will proceed to final submission via the conclusion screen of the online application (see Step 5).

Post-Submission Expectations:

Step 6: After You Submit

- ☐ After submission, the application is locked and becomes your final application submission. A read-only copy of the submitted application questionnaire is accessible by using the Applications link (click on Online Application Tools icon) in your Online Accreditation account.
- ☐ Upon submission of the application and case studies the IAC will begin the internal review process. The internal review, peer review and board review are conducted prior to a decision being rendered.
- ☐ The application review process takes approximately 8 to 10 weeks* to complete. The accreditation decision will be provided to the facility via a notification letter that ma downloaded from the Online Accreditation account.

**For expedited applications, ensure that the case study images and ntom images are received by the IAC within two business days after final submission of the application.*

Review Process takes 8-10 WEEKS

CT Workflow AFTER Accreditation

HEAD & NECK SURGERY

OF KANSAS CITY, P.A.

EAR, NOSE AND THROAT CARE
FOR CHILDREN AND ADULTS

CT Workflow

1. **Appointment #1**
   a. Order CT |*<u>**Ordering Physician**</u>
   b. Pre-Cert CT |Surgery Scheduler for Ordering Physician
2. **Appointment #2**
   a. Perform CT scan |Nurse for Ordering Physician
   b. Review images with patient |*<u>**Ordering Physician**</u>
   c. Create Surgery Roadmap or Alternative |Surgery Scheduler for Ordering Physician
3. **Encounter #3**
   a. Completes **CT Final Report** |*<u>**Interrupting Physician**</u>
   b. Pre-Cert & Schedule Surgery |Surgery Scheduler for Ordering Physician
      i. *Addendum Process if necessary*
4. **Surgery**
   a. Perform Endoscopic Sinus Surgery |*<u>**Ordering Physician**</u>
5. **Post-Operative Appointments** |*<u>**Ordering Physician**</u>
